

# Steps to deactivate your license

## Keep the following in mind:

### Gevvatec Labeling Software not enabled

If you cannot carry out the deactivation of your license on your Gevvatec labeling software because it is not installed on the PC (it was uninstalled, it's not running or the PC was formatted) you will be able to deactivate it on the private area at <https://www.gevvatec.com>.

To do so, go to the "Licensing" option on the website, locate the license you want to deactivate and click the "Deactivate license" button. This deactivation method should ONLY be used in case the deactivation process is not possible from the Gevvatec labeling software.

#### PKC

You can check the deactivated license in the "Licensing" menu option at <https://www.gevvatec.com>

#### Several PKC

In case you have several licenses you will be able to consult which are activated or deactivated accessing to the "Licenses" option at <https://www.gevvatec.com>

#### Gevvatec Support Team (GST)

If you have any questions regarding the deactivation process, please send your queries to [soporte@gevvatec.com](mailto:soporte@gevvatec.com)
